

SHOWER

This is what you need

- Limescale remover
- Scrubbing brush
- Rubber scraper
- Cloth

Cleaning the shower

1. Spray limescale remover on the shower walls and floor.
2. Wait for a few minutes. Follow the instructions for the limescale remover.
3. Rinse thoroughly with cold water.
4. Remove excess water with the rubber scraper.
5. Dry with a dry cloth.

TOILET

This is what you need

- Toilet cleaner
- Toilet brush
- Detergent
- Cloth

Cleaning the toilet

1. Use the toilet cleaner. Follow the instructions on the product.
2. Wipe the toilet seat with detergent and a damp cloth.
3. Dry with a dry cloth.

SHOWER DRAIN

This is what you need

- Sponge / dish brush
- Detergent

Cleaning drain with barrel

1. Remove the strainer where the water drains.
2. Pull out the drain barrel.
3. Clean the barrel (inside and out).
4. Clean the drain.
5. Replace the barrel. Push it down firmly to avoid unpleasant odours.
6. Fill the barrel with water.
7. Replace the strainer and, if there is one, the plastic pipe to the bathtub.

Cleaning cast iron drain

1. Remove the strainer where the water drains.
2. Clean the inside.
3. Flush with a strong jet of water.
4. Replace the strainer.

HAND BASIN

This is what you need

- Limescale remover
- Non-scratching sponge
- Dry cloth

Cleaning the hand basin and mixer tap

1. Spray limescale remover onto the hand basin and mixer tap. Follow the instructions on the product.
2. Clean with a non-scratching sponge.
3. Rinse with cold water.
4. Dry to a shining finish with a dry cloth.
5. Remember to clean the underside of the hand basin.
